

# Revolutionary Autism treatment.

Research studies show a 40% reduction in all autistic symptoms with brain wave training.

Clients must be able to attend to any movie on DVD. The movie dims and brightens depending on brain wave patterns. By merely preferring a brighter screen the client improves brain connections.

My clients get off meds for anxiety, attention, insomnia, etc. All my clients say they feel more calm and focused all the time because I heal the problem at the source in the brain for life.
